EDUCATION

Pallavi Engineering College

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Hyderabad, Telangana

Nov 2022 – May 2026

Relevant Course Work: Data Structures, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Artificial Intelligence, Machine Learning

EXPERIENCE

InfinityCodeNexus

Dec 2023 – Dec 2025

Software Engineer

Hybrid

- Sole developer of a full-stack ed-tech platform serving 10,000+ student logins, building the complete frontend, backend, and database schema from scratch using React, Node.js, and PostgreSQL.
- Built a feature-rich admin portal enabling content managers to create, update, and manage all platform content, user accounts, and enrollment data through a centralized dashboard.
- Integrated Razorpay payment gateway for seamless fee collection, handling end-to-end transaction flows with secure authentication and order management.

Freelance

Nov 2022 – May 2026

Full Stack Developer

Remote

- Designed and developed full-stack web applications end-to-end for clients across diverse domains using the MERN stack, from requirement gathering to production deployment.
- Maintained and debugged existing client applications, resolving issues across frontend, backend, and database layers.
- Translated client requirements into functional, performant web solutions with a focus on clean UX and long-term maintainability.

PROJECTS

CloudCode | *React Native, Node.js, Express.js, PostgreSQL, Digital Ocean, Docker*

[Demo](#)

- CloudCode** is a mobile-first engineering workspace that enables developers to code, manage repositories, and execute engineering workflows entirely from mobile devices.
- Developed integrated Git workflows, cloud development environments, terminal access, live preview, and agentic AI capable of understanding and modifying entire codebases through natural language.
- Engineered a Linux-based cloud execution infrastructure on DigitalOcean to provision secure, production-ready development workspaces with persistent remote environments.

Ezent (Acquired) | *React, Python, Flask, PostgreSQL, Supabase*

[Demo](#)

- Built an event management platform that powered 150+ events across multiple organizations, automating certificate generation and participant communication.
- Enabled organizations to create forms, collect real-time submissions, and automatically email certificates using Puppeteer and Supabase.
- Offered custom subdomains for event branding and hosting, supporting hackathons, workshops, and academic programs at scale.

FusePlane | *Nextjs, Typescript, PostgreSQL, Cloudflare, Nodejs, Express.js*

[Demo](#)

- Built a developer control plane for secure third-party API integrations through unified endpoints.
- Implemented provider authentication, request validation, rate limiting, and centralized integration management.
- Developed a dashboard to configure, monitor, and manage API integrations with access controls and usage analytics.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL (PostgreSQL), NoSQL (MongoDB), C, HTML5, CSS3

Frameworks & Libraries: React, React Native, Next.js, Node.js, Express.js, FastAPI, Flask, LangChain, LangGraph

AI & Agent Systems: LLM APIs, Model Context Protocol (MCP), AI Agents, RAG, Function Calling, Vector Search

Cloud & DevOps: Docker, Linux/Unix, Digital Ocean, Google Cloud Platform (GCP), Cloudflare, Firebase

Tools & Technologies: Git, REST APIs, WebSockets, Puppeteer, GitHub Actions, JWT Authentication
